SUMMARY

International IT Professional with 20+ Years of Experience

A seasoned IT professional with over 20 years of experience in the IT/Telecom industry, adept at managing resources while working across various roles such as system engineer, support engineer, and deployment engineer. Proven expertise in the areas of Service Fulfillment, Order Management, Workflow Management, Network Performance, Alarm Management, and Fault Management.

In addition, I possess hands-on expertise in **DevOps** methodologies, automation, and **open-source technologies**. My proficiency in tools such as **Jenkins**, **Docker**, **Kubernetes**, **Ansible**, and **Git** has enabled me to streamline deployments, improve system performance, and foster collaboration across teams in fast-paced environments.

PROJECT

1. Customer Complaint Process Revamp (Service Fulfillment & SLA Management)

Technologies: Salesforce, ServiceNow, Jira, Confluence

Achievements: Streamlined workflows and automated key processes, reducing customer complaint resolution time by 30%. Improved SLA adherence by introducing real-time monitoring and tracking of complaint statuses. Collaborated cross-functionally with customer service, IT, and operations teams to ensure seamless implementation.

2. DevOps Pipeline Implementation (DevOps)

Technologies: Jenkins, Docker, Kubernetes, GitLab CI, Helm Chart, Ansible, Terraform

Achievements: Designed and deployed an automated pipeline to support continuous integration and deployment, reducing release cycles by 40%. Automated infrastructure provisioning and configuration management using Ansible and Docker. Collaborated with development teams to integrate testing and deployment, improving code quality and reducing production bugs.

TECHNICAL SKILLS

Languages:	Python (Advanced), Bash (Intermediate), SQL (Intermediate), JavaScript (Intermediate), PHP(Intermediate)
DevOps & Automation Tools:	Jenkins, Docker, Kubernetes, Ansible, Terraform, Git, GitLab CI, Helm ,Prometheus & Grafana (Monitoring & Visualization)
Cloud Platforms:	Amazon Web Services (AWS),,Microsoft Azure, Google Cloud Platform (GCP)
Infrastructure & Systems:	Linux (Ubuntu, CentOS, RHEL), Windows Server, Virtualization (VMware, Hyper-V) Configuration Management (Ansible, Chef, Puppet)
Networking & Security:	Network Configuration & Troubleshooting, VPNs, Firewalls, Routers & Switches, Fortinet: F5 ,SNMP, Nagios, SolarWinds (Network Monitoring), Security Tools (SELinux, OpenSSL, IPTables)
Containerization & Orchestration:	Docker (Containerization), Kubernetes (Orchestration & Management), Helm (Package Management)
CI/CD & Version Control:	Jenkins, GitLab CI, Git (Version Control), Bitbucket, GitHub

Database & Data Management:	MySQL, PostgreSQL, SQLite, NoSQL (MongoDB, Redis), Database Optimization & Query Tuning
Monitoring & Logging:	Nagios, Zabbix, Prometheus, Grafana (Dashboards), ELK Stack (Elasticsearch, Logstash, Kibana)

PROFESSIONAL EXPERIENCE

Orange Business (APAC)

Kuala Lumpur, Malaysia

Senior Support / Deployment Engineer

Feb, 2022 - Present

- Lead the design, deployment, and integration of AWS-based solutions, managing the full application stack from OS-level configurations to custom application environments.
- Oversee the integration of **OTT/IPTV** solutions for telecom operators, ensuring smooth deployment and integration into operator environments across APAC.
- Managed large-scale data infrastructure, integrating **Oracle, MongoDB, and SQL/NoSQL** databases, enabling efficient data management and storage solutions.
- Built and maintained infrastructure using **Docker, Kubernetes, and Terraform**, reducing deployment times and enhancing scalability.
- Collaborated with cross-functional teams in Europe to bridge the gap between technical and business needs, delivering solutions that meet security and performance requirements.
- Acted as a liaison between technical teams in APAC and Europe, ensuring the alignment of technical solutions with business needs and security requirements.
- Worked with architects and engineers to design scalable networks and storage solutions.
- Deploy and maintain PaaS & SaaS enterprise applications for development, QA, staging, and production environments hosted on cloud infrastructure.
- Supported the **deployment of digital TV and OTT solutions**, performing integration testing and ensuring alignment with business objectives and customer requirements.
- Understanding of a multitude of resources and services such as containers, virtual machines, storage, firewalls, network security groups, web application firewalls, vnets, log analytics, sentinel, monitoring, alerting, metrics, Data Factory, Databricks, Active Directory, Data Catalog, Web Apps, Functions, Application Service Environments, Key Vaults, Backups.
- Knowledge with Video transcoding , packaging, delivery networks & DRM – advantage
- Spearheaded **API testing** using **Cucumber, Python, and JavaScript**, ensuring application quality and functionality.

PCCW Solutions Malaysia Sdn Bhd (APAC)

Kuala Lumpur, Malaysia

Service Support Assurance- OSS Engineer

Oct, 2019- Feb, 2022

- Design, develop and use Operations Policies for smooth operation of **OSS Service Assurance Services, Business Process using Framework (eTOM)**.
- Create and maintain end-to-end architecture artifacts including but not limited to, High Level design, interface design document, process design document, sequence diagrams, data flow diagrams and data models across the OSS ecosystem
- Managing customer relationships spans an enterprise from marketing to ordering to billing to after-service support and follow-on sales.
- Regularly Meet with Operations teams to understand their concerns and develop action plans and strategy to address them.
- Planning OSS Service Assurance function's roadmap and strategy as per the prevailing Telecom technologies like **Fixed line, IP based services, GSM, 3G** etc.
- Strong hands on areas of OSS domain- Inventory, Provisioning/Activation, Order Management and Fault/Performance management etc.
- Experience with deployment of OSS and Network and Customer Provisioning, Operations, and Diagnostics systems through the delivery lifecycle from initial design to full operationalization
- An excellent knowledge of operator's fulfillment & assurance processes and link to operator's end-to-end business processes
- Solid experience in as-is/to-be architecture planning, solution scoping and design in OSS domain
- Interface with IT to ensure required **OSS/BSS integration** points are identified and addressed in a timely and effective manner.
- Experience in designing or implementing integration projects with various network management and/or Trouble Ticketing tools over standard interfaces (**SNMP/ CORBA / XML/ SOAP**, etc)

Adstream Asia OnTime (M) Sdn Bhd (APAC)

Kuala Lumpur, Malaysia

Technical Support Expert- Level 2

Dec, 2018 - Oct, 2019

- Automation of deployment workflows using **Jenkins, Heroku, and AWS CodePipeline**, enhancing development velocity and reducing deployment errors.
- Collaborated with developers to implement continuous integration and continuous delivery (**CI/CD**) pipelines to streamline software development lifecycle processes.
- Utilized **AWS EC2, S3, and RDS for building scalable web applications**, ensuring high uptime and smooth customer experiences.
- Developed automation scripts in Python and Bash to facilitate routine server maintenance and infrastructure scaling tasks.

- Integrated AWS services such as S3, Lambda, and API Gateway to streamline application development and delivery processes.
- Worked with Node.js and Express to build scalable server-side applications, utilizing AWS RDS for backend data management.
- Implemented front-end technologies including **AngularJS, JavaScript, and Bootstrap** for responsive and dynamic user interfaces.

BT System (Malaysia) Sdn Bhd (APAC)

Kuala Lumpur, Malaysia

Senior Support/System Engineer

Jun, 2017 - Dec, 2018

- Led the design and implementation of **CRM** consolidation and **Master Data Management (MDM)** projects for a major UK-based telecom operator (BT).
- Expertise in number portability, including systems such as **IPEX, Hosted Voices, Mobile, and Future Voice**.
- Hands-on experience with **Number Portability (NP) systems integration** and provisioning processes across different telecom services.
- Expertise in **Strategic Numbering (SN) systems**, handling complex data flows, Number Management (MNUM), and number portability for UK-based telecom operator.
- CRM consolidation, Master Data Management (MDM), Strategic Numbering (SN), Number Portability (IPEX, Hosted Voices, Mobile, Future Voice).
- Extensive experience with data systems supporting **Mobile Portability, IP-based Number Portability, and Hosted Voice services**.
- In-depth knowledge of telecom billing systems and integration with number portability solutions.
- Experienced in DevOps practices to streamline development pipelines, increase automation, and support continuous integration and delivery.
- Hands-on experience in implementing CI/CD pipelines to improve software deployment and ensure higher-quality releases.
- Familiarity with Agile and Lean methodologies to ensure timely and efficient project delivery.

Aptilo Networks Sdn Bhd (APAC)

Kuala Lumpur, Malaysia

Senior Support / Delivery Engineer

Feb, 2014 - Jun, 2017

- Worked with Solutions Architects to produce technical specifications for custom development and system integration needs.
- Led pre-sales efforts with customers, vendors, partners, and PM teams to design and propose solutions for APAC telecom operators.
- Contributed to RFP, RFI responses, and PoCs to support service offerings and customer proposals.
- End-to-End Test Plan Development: Created and executed system test plans and UAT (User Acceptance Test) plans for telecom solutions.
- Extensive hands-on experience in functional, integration, and customer use-case testing for wireless products.
- Expertise in **802.11 wireless standards (a/b/g/n/ac, Passpoint, Hotspot 2.0, 802.11u)** and wireless networking technologies.
- Proficient in RADIUS authentication (**EAP-SIM, EAP-AKA, EAP-PEAP, EAP-TLS, EAP-TTLS**) and **SNMP**.
- Led integration projects for **Wireless Access Gateways (WAG)**, including **ALU 7750, CISCO ISG, Aruba, Ruckus, and APTILO AC**.
- Integration experience with telecom platforms such as **HLR, PCRF, CMS, PMS, CRM, OSS/BSS, SMS messaging (SMPP), and payment gateway systems**.
- Collaborated with tier 1-2 telecom operators to design and implement solutions across wireless networks, addressing customer requirements in hotspot and Wi-Fi environments.

HOMT Infrastructures, Spain

Luanda, Angola

System Engineer(BOSS Platform) (On Contract)

Aug, 2012 - Feb, 2014

- Administered OSS systems, performing routine **health checks**, monitoring **alarms**, and analyzing **database usage, file system size, and backup status** to ensure system stability.
- Managed **disaster recovery and business continuity plans** using **NetApp Protection Manager (SnapVault and SnapMirror)**, ensuring minimal downtime during system failures.
- Installed, configured, and maintained VMware and VirtualBox environments, providing optimized virtualization support for enterprise IT infrastructure.
- Monitored and troubleshoot **Splunk servers**, fine-tuned network devices, and ensured network availability and performance for the telecom network infrastructure.
- Configured and supported **Fortinet FortiGate devices** for firewall security, including load balancing and firewall configuration for Layer 2 and Layer 3 networks.

Openet Telecom Malaysia Sdn Bhd (APAC)

Kuala Lumpur, Malaysia

Operations / SystemEngineer

Jun, 2011 - Aug, 2012

- Worked with **Openet Convergent Mediation** to manage and test CDR data flow for telecom billing and mediation systems, improving data integrity and reducing processing errors.
- Led **Openet PCRF** business logic testing, validating PCEF responses and ensuring conformance to **3GPP and IETF** standards for LTE/EPC network environments.
- Utilized **DSD scripting** for automated test case execution and data stream decoding, optimizing testing time and enhancing

the reliability of test results.

- Worked closely with software and test engineers to create and execute test cases, track issues, and provide actionable feedback for system improvement.
- Engaged in end-to-end testing for **LTE/UMTS technologies**, including GTP and Diameter protocol testing, ensuring accurate data flow and session management.
- Worked with software engineers to create detailed test scripts and defined comprehensive test cases for **System Integration Testing (SIT) and User Acceptance Testing (UAT)**.
- Monitored **Deep Packet Inspection (DPI)** data flows and analyzed policy control functionality for real-time network traffic management.

Alcatel-Lucent, Fr S.A

Luanda, Angola

IT System Engineer (Test/Comm/Network Admin) (On Contract)

Jun, 2009 - May, 2011

- Implemented and supported **Alcatel OSS/BSS Solutions** for large-scale telecom networks, including service fulfillment, billing, and customer relationship management **Coheris (CRM)**.
- Managed **Alcatel 8920 (SQM)** for Service Quality Management and ensured efficient monitoring of network performance and fault management for a telecom provider.
- Configured and maintained **Alcatel 8965 (C3S)** Billing Mediation System, streamlining telecom billing processes and integrating with Oracle database systems for accurate billing and reporting.
- Managed network operations using **Alcatel 8920 (FM)** for Fault Management and **Alcatel 8920 (PRM)** for Problem Management, reducing network downtimes and improving service reliability.
- Supported **WIMAX, PSTN/ADSL, and CDMA technologies** for various service providers, ensuring optimal system performance, service provisioning, and network maintenance.
- Implemented **Alcatel A8950 Provisioning System**, improving customer service fulfillment and reducing the time to activate new services.
- Managed **Alcatel SDM 8650 AAA Radius system**, providing secure authentication, authorization, and accounting for telecom services.
- Ensured high availability of telecom systems using clustering, load balancing, and **Veritas Cluster Manager for High Availability (HA)** for mission-critical services, including Oracle and telecom application servers.
- Administered SAN, backup, and recovery solutions for critical telecom and OSS/BSS data, ensuring high uptime and data integrity.

UT Starcom India Telecom Pvt. Ltd.

Gurugram, India

GSSI Engineer

Jul, 2008 - Jun, 2009

- Installed, configured, and maintained **UTStarcom RollingStream (IPTV Headend, Middleware, and Content Delivery)** for content management and delivery, ensuring robust VOD and live TV streaming capabilities for end-users.
- Integrated with **Optibase CDN Live (Video Content Delivery & Optimization)** IPTV infrastructure to enable high-quality video streaming across multiple platforms.
- Monitored and maintained IPTV headend systems, performing network analysis to optimize service performance and troubleshoot latency and bandwidth issues.
- Worked on optimizing video streaming technologies (RTSP, RTP, MPEG-DASH, UDP Multicast) with UTStarcom RollingStream platforms to enhance VOD and live TV streaming.
- Configured and supported **UTStarcom RollingStream STB**, resolving issues related to video playback, channel zapping, connectivity, and user interface malfunctions/CRs.

IOL Broadband Ltd.

Mumbai, India

System Engineer

May, 2007 - Jul, 2008

- Spearheaded IPTV service delivery optimization using **Kaseena Middleware** (System Integration, Content Management) and **Seachange Media Delivery** (VOD & Live Streaming Services) systems, improving video delivery performance and reducing latency by 30%.
- Managed and configured VOD (Video on Demand) and live TV services, ensuring seamless integration between Kaseena Middleware and Seachange Media Delivery platform for efficient content delivery.
- Implemented multicast video streaming, ensuring optimal delivery and reducing buffering by optimizing network routing and traffic management.
- Developed automation scripts in Python to monitor video streaming quality, network performance, and system health, proactively addressing potential service interruptions.
- Collaborated with cross-functional teams to troubleshoot and resolve complex issues related to video playback, **Amino/Aviva** IPTV STB configuration, and service interruptions.

Inventum Technologies Pvt. Ltd.

Noida, India

Tech Support- Level 2

Dec, 2006 - May, 2007

Microsence India Pvt. Ltd.

Kolkata, India

Customer Support Engineer (On Contract)

Sep, 2006 - Dec, 2006

EDUCATION

IGNOU SOC&IS Bachelor Of Computer Applications**DELHI, INDIA**

Jun, 2006

CERTIFICATION

- Certified SAFe® 5 Agilist Dec, 2022
- Deep Learning Prerequisites: The Numpy Stack in Python (V2+) Jun, 2020
- MongoDB -M103: Basic Cluster Administration Sep, 2019
- MongoDB -M220P: MongoDB for Python Developers Sep, 2019
- MongoDB-M001: MongoDB Basics Aug, 2019
- MIT 6.00.1x: Introduction to Computer Science and Programming Using Python, Credential ID 23fbe77018124839bb8de06b81557c2f Aug, 2018
- Palo Alto Networks-ACE PAN OS 8.1version Jun, 2018
- SoloLearn - HTML5, Credential ID 1014-8365311 May, 2018
- SoloLearn -Python 3, Credential ID 1073-8365311 Feb, 2018
- SCSA - Sun Certified System Administrator (Solaris 10), Candidate ID: SR5459580 Apr, 2009
- CCNA - Cisco Certified Network Associate (640-801), Cisco ID: CSC011057874 May, 2006
